

Test Scores

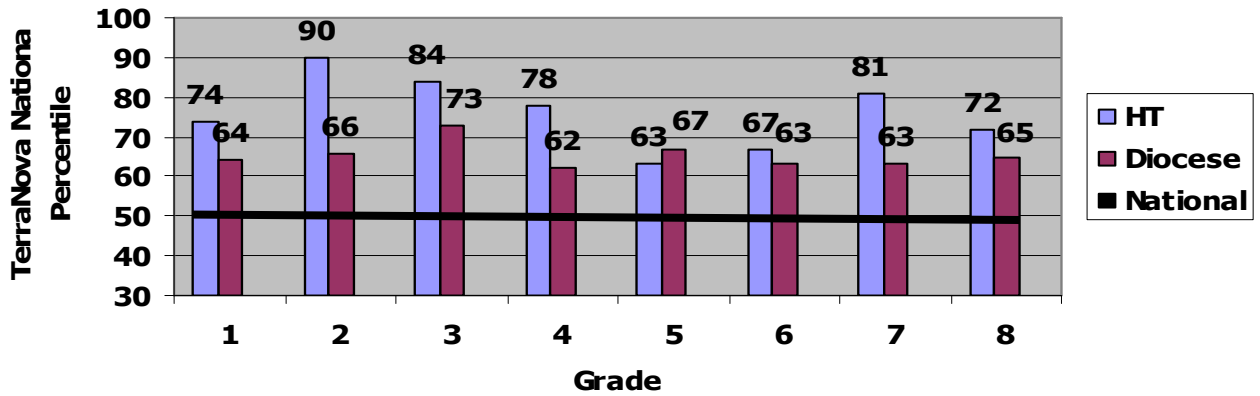

The Standardized test measures what is considered to be important instructional content. It tests academic attainment and provides valid and reliable comparisons of achievement. These scores are but one tool which indicates how well each student is progressing in school. They are part of a bigger picture. Classroom work and evaluation are as important in measuring performance.

Holy Trinity students are tested in grades 1-8 and the Archdiocese has chosen Terra Nova, The Third Edition Plus which tests the five main content areas of Reading, Mathematics, Science, Social Studies and Language Arts. Additionally, five sub tests, word analysis, vocabulary, language mechanics, spelling and mathematics computation are also given. Grades 3, 5, and 7 are given a multiple assessment test. Constructed response items on these tests require students to create their own answers by writing a paragraph, or drawing a graph or model.

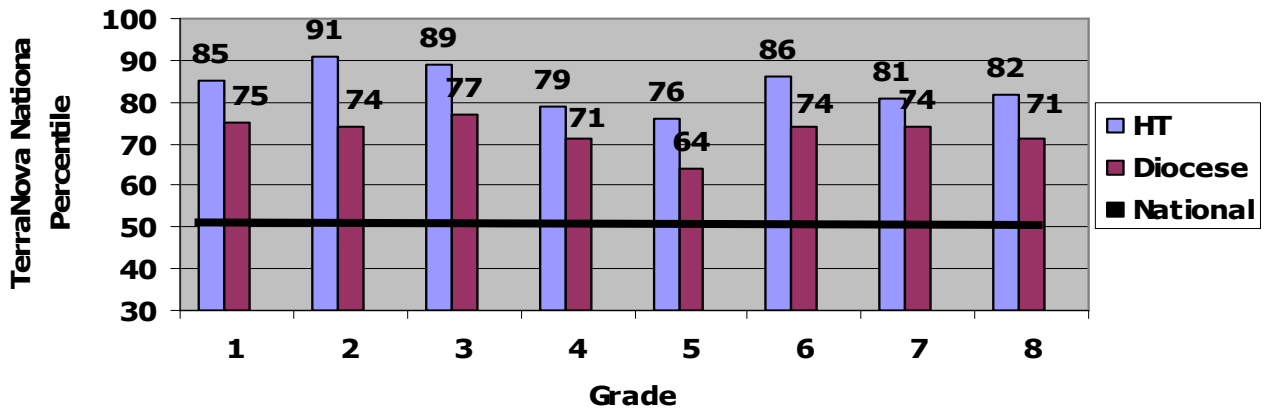

The following graphs show Holy Trinity Interparochial School's average performance in comparison to the national performance and other schools in the diocese.

Science 2009-2010

Social Studies 2009-2010

Language Arts 2009-2010
